# Ground Covers

Plant Name	Size	OP/1L	PB3/5	PB12/18	Eco-Source	
Acaena anserinifolia			PB3		Canterbury	Green foliage. A fast growing with creeping habit. White flowers October to December. Partial shade or full sun.
			\$17.50			
Acaena buchananii			PB3			Blue green. Forms patches up to 50cm or more. Prefers light shade and moist soil.
			\$17.50			
Acaena buchananii var Picta			PB3			Densely matted creeping plant. Slightly grey/bronze colouring. Forms patches up to 50cm or more.
			\$17.50			
Acaena caesiiglauca			PB3			Grey and purple foliage. Can be grown as a groundcover or hanging plant on walls. Partial shade or full sun.
			\$17.50			
Acaena inermis "purpurea"			PB3			Purple foliage with purple flowers from December to February. Spreading ground cover. Full sun or shade.
			\$17.50			
Acaena microphylla			PB3			Full sun. Effective red & green foliage. Ideal for rock gardens. Prefers partial shade
			\$17.50			
Anaphalioides bellidioides			PB3		Canterbury	Sun or semi-shade, dry or moist. White papery flowers oct to feb. Ideal for rock garden. Frost hardy
			\$17.50			
Brachyglottis lagopus	1 litre				Canterbury	An alpine species with daisy like flowers which appear November to January. Great for rock gardens
			\$13.50			
Coprosma "Mangitangi"			PB3			A small divaricating shrub growing to 75 cm high. Plants stay in tight mounds and small look rather like hedgehog. Prefers shade.
			\$17.50			
Coprosma acerosa	OP					Groundcover. Sun or semi-shade, dry or moist. White or blue fruit from March to April. Attracts birds. Coastal tolerant.
			\$7.00			
Coprosma acerosa BP	OP				Canterbury	Groundcover. Sun or semi-shade, dry or moist. White or blue fruit mar to apr. Attracts birds. Coastal tolerant. Local variant.
			\$7.00			
Coprosma 'Dark Spire'			PB3			An attractive narrow growing shrub to 1-1.5m high. Best grown in a sunny site. Hardy.
			\$17.50			
Coprosma 'Flat Freddy'			PB3			Very low growing groundcover, hardy to some foot traffic. Bronze brown colour. 8cmx1m.
			\$17.50			

Coprosma 'Hawera'		PB5			A mat forming coprosma with small narrow olive-green leaves. Tolerant of cold and wind, great coastal plant.
			\$17.50		
Coprosma kirkii		OP			Sun or semi-shade, dry or moist. Coastal tolerant .Forms trailing mats. A vigorous and extremely hardy groundcover.
			\$7.00		
Coprosma Red Rocks		PB5			A very hardy shrub with interesting red-brown foliage. Forms a cushion like shape. 1m
			\$17.50		
Dysphyma australe	9cm			Canterbury	A densely branched succulent plant. It has pink flowers and is naturally found hanging down cliffs. Grows 1m +.
			\$7.00		
Euphorbia glauca		PB3		Canterbury	Blue foliage and red/purple flowers. Grows to 45cm tall. Best in well drained soil, tolerates coastal conditions.
			\$17.50		
Fuchsia procumbens		PB3			Frost tender. Prefers a sheltered semi-shaded site with adequate moisture in well drained soil. Flowers are yellow/orange.
			\$17.50		
Geranium brevicaule	1 litre				Forms a neat green ball shape and has white flowers. Likes dry/well drained sunny and exposed sites. Frost hardy.
			\$13.50		
Geranium brevicaule "purpureum"	1 litre				Suits the same conditions as the green form but has a purple/bronze foliage that can vary depending on the site.
			\$13.50		
Geranium traversii		PB3			Pink flowers from Oct to Feb. Low growing. Ideal for rock gardens. Prefers dry/well drained position and sun/semi-shade.
			\$17.50		
Gautheria antipoda		PB3			A small plant growing to 50cm. Full sun or semi-shade.
			\$17.50		
Gunnera monica		PB3		Canterbury	Mat forming and creeping plant. Frost hardy. Prefers sun or semi-shade with moist soil.
			\$17.50		
Gunnera prorepens		PB3			Prefers a moist soil in sun or semi-shade. Bronze/green foliage. Vigorous plant.
			\$17.50		
Halargoris erecta bronze form		PB3			Fast growing to 1m tall. Naturally grows along forest margins, banks, cliffs etc. sun, shade dry and exposed conditions.
			\$17.50		
Halargoris erecta		PB3			Fast growing to 1m tall. Naturally grows along forest margins, banks, cliffs etc. sun, shade dry and exposed conditions.
			\$17.50		
Leptinella "Platts Black"		PB3			Feathery green to charcoal foliage. A vigorous creeping plant which is great as a lawn replacement. Best in full sun with adequate moisture.
			\$17.50		
Leptinella calcarea		PB3			Forms a light green carpet. It can take coastal conditions, and is very hardy. It has small yellow flowers. Prefers full-sun.
			\$17.50		
Leptinella dioica		PB3			A mat forming groundcover that is quick growing. Makes a great lawn replacement. Requires good drainage and moist soil.
			\$17.50		
Leptinella minor		PB3		Canterbury	A groundcover that suits sun or semi-shade, moist. White flowers. Can be invasive. Full sun gives brown foliage
			\$17.50		

Leptinella nana		PB3		Canterbury	A groundcover that suits shade or semi-shade, moist. White flowers.
			\$17.50		
Leptinella rotundifolia		PB3			An endangered groundcover found naturally on coastal cliffs. Very hardy in semi-shade/shaded, exposed sites but requires moisture.
			\$17.50		
Leptinella serrulata		PB3			This groundcover has fern like purple/grey to bronze foliage. Hardy.
			\$17.50		
Leptinella squalida ssp.		PB3			A groundcover that suits semi-shade or shade, and moist soil. Can be invasive.
			\$17.50		
Linum monogynum		PB3		Canterbury	True NZ flax. Likes coastal conditions. Has masses of white flowers from Oct - Feb. Likes a well drained, exposed position in full sun or semi shade.
			\$17.50		
Lobelia angulata		PB3			A creeping matt forming plant. Vigorous plant, sun or shade. Profusions of white flowers.
			\$17.50		
Lobelia macrodon	1 litre				
			\$13.50		
Jovellana Sinclairii		PB3			Prefers well drained soil and shade. Frost sensitive. It has masses of white flowers spotted with purple on long slender stalks from Oct to Feb.
			\$17.50		
Mazus Matapouri Bay		PB3			A vigorous spreading, ground hugging plant covered in small lilac flowers. Prefers a damp situation.
			\$17.50		
Mazus radicans		PB3			Found in damp places in the sun this plant forms a mat that covers itself in flowers that are white with a purple and yellow throat in Nov - Mar.
			\$17.50		
Mentha cunninghamii		PB3		Canterbury	
			\$17.50		
Muehlenbeckia axillaris		PB3			Attracts the copper butterfly. A groundcover/climber. Full sun, hardy. Tolerant of dry conditions. H15c W1m
			\$17.50		
Muehlenbeckia complexa		PB3		Canterbury	A sprawling coastal shrub that grows into a tangled mass of brown wiry stems with small round leaves. A vigorous and tough plant.
			\$17.50		
Myosotidium hortensia		PB3			Chatham Island forget-me-not. Flowers are pale to dark blue. Prefers semi-shade, and moist site.
			\$17.50		
Pimelea carnosa		PB3			A low growing plant with white, scented flowers Oct through to Mar. Prefers well drained soil, full sun or semi shade.
			\$17.50		
Pimelea oreophila	1 litre			Canterbury	A low growing, sprawling plant up to 30cm tall. Covered in creamy-white, strongly scented flowers from October to January. Well drained soil.
			\$13.50		
Raoulia australis	1 litre				This is a dense and compact ground cover. Yellow flowers in abundance during Oct to Nov. Plant in full sun in a gritty soil.
			\$13.50		
Raoulia hectorii	1 litre				Forms a hard bright silvery green moss like mat. Prefers a well drained gritty soil and a sunny site.
			\$13.50		

Raoulia hookeri		PB3		Vegetable sheep. During Dec and Jan, it gets a cover of sweetly scented, pale yellow flowers. Prefers moist position, and well drained soil.
			\$17.50	
Raoulia monroi		PB3		Sun or semi-shade, moist, well-drained. Effective foliage. Ideal for rock garden
			\$17.50	
Raoulia subsericea		PB3		A mat forming groundcover. Covered in scented white flowers during Nov to Jan. Prefers full sun. Tolerates dry conditions.
			\$17.50	
Raoulia tenuicaulis		PB3		Fast growing. Frost hardy. Prefers full sun or partial shade in a moist but well drained soil. White flowers Dec - Jan.
			\$17.50	
Rubus parvus		PB3		A spikey scrambling ground cover. Small white flowers appear in spring and these are followed by attractive raspberry like fruits. Prefers full sun.
			\$17.50	
Rubus x barkeri		PB3		A spikey scrambling ground cover. Prefers full sun. Very hardy. Tolerates dry conditions.
			\$17.50	
Thyridia repens	1 litre			A creeping plant that forms large mats. Leaves are lush green to bronzy green and are covered with creamy white flowers from Dec - Mar.
			\$13.50	
Scleranthus biflorus		PB3		It forms low moss like mounds of tightly packed tiny leaves and has minute greenish flowers. Prefers full sun and well drained soil.
			\$17.50	
Scleranthus uniflorus		PB3		This species is very similar to Scl. biflorus but has a tighter habit. Low growing and mound forming. Full sun.
			\$17.50	
Scutellaria novae zelandiae	1 litre			Small semi-woody plant with erect branches growing to 30 cm tall. It flowers December through to March. Prefers moist soil and shade.
			\$13.50	
Selliera radicans		PB3	Canterbury	A low growing, wide spreading groundcover. Great lawn replacement. Prefers full or partial shade. Likes well drained soil.
			\$17.50	
Viola lyallii		PB3		NZ Viola. Small creeping perennial herb with green heart shaped leaves. Prefers partial shade and moist soil. White flowers from Oct to Jan.
			\$17.50	
Wahlenbergia pygmaea	1 litre			A low growing perenial 1-2 cm high, with white-blue flowers Nov-Feb. Likes a sunny site with adequate moisture and good drainage.
			\$13.50	

We also have access to a wide range of other varieties that we do not grow ourselves. If we do not have what you seek please ask our staff.

# Astelias, Flaxes and Sword shaped leaves

Plant Name	Size	OP/1L	PB3/5	PB12/18	Eco-Source	
Aciphylla aurea			PB3		Canterbury	A very spectacular plant with dramatic foliage. Best grown in an open sunny position that is well drained or dry. Flowers Dec to Jan.
			\$17.50			
Aciphylla colensoi			PB3			Prefers moist / well-drained position. Flower stalk 2.5 M tall is scented. Bluish coloured sword-like leaves. Subalpine/alpine plant
			\$17.50			
Aciphylla dieffenbachii			PB3			Yellow flower 1 metre tall. Sun or shade, deep moist soil. Effective foliage. Coastal tolerant.
			\$17.50			
Aciphylla squarrosa			PB3			Prefers open situation and good drainage flower stalk up to 2M, yellowish, scent. Bluish-grey sword-like leaves. Subalpine & coastal plant.
			\$17.50			
Aciphylla subflabellata			PB3		Canterbury	Spear Grass. Sun, deep moist soil .Yellowish flower Nov to Jan. Effective foliage, spikey. Found locally.
			\$17.50			
Arthropodium candidum			PB3			Prefers semi-shade and moist soil. Very adaptable White flowers nov to jan. Winter dormant. Grows 10-15cm and is spreading via rhizomes.
			\$17.50			
Arthropodium candidum purp			PB3			Prefers semi-shade and moist soil. Very adaptable White flowers nov to jan. Winter dormant. Grows 10-15cm and is spreading via rhizomes.
			\$17.50			
Arthropodium cirratum			PB3			Ringa ringa. Sun or shade, dry or moist, med frost. White flowers nov to dec. Ideal for underplanting. 60cm tall and clump forming.
			\$17.50			
Arthropodium Matapouri Bay			PB3			Ringa ringa. Sun or shade, dry or moist, med frost. White flowers Nov to Dec. Ideal for underplanting. Similar to A. cirratum but more upright.
			\$17.50			
Astelia chathamica			PB5			Striking silver foliage, growing to 1.5m tall with a width of 1m +. The fruit is highly attractive for birds, appears Feb to Jun and are bright orange.
			\$17.50			
Astelia fragrans		OP	PB5		Canterbury	Thrives in semi-shaded sites, ideal for under-planting. The fruit is highly attractive to birds and are strongly honey scented appearing Dec - May.
		\$7.00	\$17.50			
Astelia nervosa			PB3		Canterbury	Sun or shade, moist or wet. Bright orange fruit mar to may. Effective silver foliage. Attracts birds. 75cm x75cm
			\$17.50			
Astelia Rebel			PB5			Reddish bronze leaves which turn a rich claret in winter. Ideal for rockeries, mass plantings or containers. Prefers full sun. 75x75cm.
			\$25.00			

Celmisia mackaui		PB3		Canterbury	Akaroa Daisy. A local plant only found on Banks Peninsula. Great for rock gardens. Prefers shade or semi-shade. Flowers Jan - Feb.
			\$17.50		
Dianella nigra		PB3			NZ Blueberry. Small white flowers Nov-Dec, pale blue-purple berries Feb and Mar. Prefers full sun or partial shade, well drained and exposed sites.
			\$17.50		
Libertia cranwelliae		PB3			NZ Iris. Very similar to Libertia ixioides but spreads through rhizomes. Hardy to sun or semi shade. Will tolerate drier sites.
			\$17.50		
Libertia grandiflora		PB3			NZ Iris. A clump forming plant reaching 50cm tall. Clusters of white flowers from Oct - Nov.
			\$17.50		
Libertia ixioides		PB3		Canterbury	Nz Iris. Clump forming to 50cm tall, white flowers from Oct-Dec. Very hardy and will grow in all conditions. It is an ideal pot plant.
			\$17.50		
Libertia ixioides Canterbury		PB3			Our own reddish form of Lib. ixioides. Clump forming to 50cm tall, white flowers from Oct-Dec. Very hardy and will grow in all conditions.
			\$17.50		
Libertia peregrinans		PB3			A creeping plant. Hardy to dry, exposed sites. Prefers full sun. White flowers from Oct to Jan. Bright orange leaves in optimal conditions.
			\$17.50		
Phormium Black Rage		PB5			A bold striking flax with blue-black foliage. Hardy and grows in most conditions. 1.5 x 1m.
			\$20.00		
Phormium 'Black Pepe'		PB3			Copper coloured flax. Easy to grow plant for low maintenance gardens. Ideal for coastal areas. Grows best in moist soil. 75 cm x 75 cm.
			\$20.00		
Phormium cookianium	OP	PB5			Dwarf flax. Yellowish to orange flowers from Nov to Dec. Attracts Tui and Bellbirds. Likes sun or semi-shade. Tolerates dry or moist soils.
	\$7.00		\$17.50		
Phormium 'Dark Delight'		PB5			Deep purplish bronze leaves becoming darker with age. Great contrast plant along with lighter leaf colours. Hardy. Height 1m.
			\$20.00		
Phormium 'Elfin'		PB5			A small growing native flax, with distinctive curled ends to its bronze leaves. Compact and hardy flax. 40 x 40cm.
			\$20.00		
Phormium 'Emerald Gem'		PB3			Dwarf flax with emerald green leaves. Hardy and wind resistant. Tolerates all soil types and positions. 60cm+
			\$20.00		
Phormium 'Jester'		PB5			Beautiful glossy bright red leaves with green margins. Great for a structured look. Hardy and tolerates all conditions. 75cm x 75cm.
			\$20.00		
Phormium Surfer		PB5			Small flax with bronze edges. Hardy and tolerates full sun, shade and coastal conditions.
			\$20.00		
Phormium tenax	OP	PB5		Canterbury	Flax. Growing to 1-3m high, flowers Nov to Jan. Tolerates all conditions. Attracts Tui and Bellbird.
	\$7.00		\$17.50		
Phormium Tom Thumb		PB5			Small flax with bronze edges. Hardy and tolerates full sun, shade and coastal conditions.
			\$20.00		
Phormium Wildwood		PB5			Lush purple flax. Hardy and tolerates full sun, shade and coastal conditions.
			\$20.00		

# Grasses

Plant Name	Size	OP/1L	PB3/5	PB12/18	Eco-Source	
Anemanthele lessoniana		OP			Canterbury	Windgrass. Prefers semi-shade, and moist conditions. Orange, green and red hued leaves. Grows to 1m x 1m.
		\$7.00				
Apodasmia similis		OP	PB5		Canterbury	Oi Oi also known as jointed rush. A dry tolerant coastal and salt marsh plant. Spreading via rhizome. Full sun or shade, dry or moist soils.
		\$7.00				
Austroderia richardii		OP			Canterbury	Toi toi. Tolerates sun or shade, dry or moist soils. Flower plumes from Dec - Jan. Attracts birds. Fast growing to 3m+
		\$7.00				
Austrofestuca littoralis		OP				A grass that forms clumps up to 60cm tall. Great coastal plant that requires well drained sites. Prefers full sun.
		\$7.00				
Carex albula		OP				A tufted sedge with pale blue leaves. Grows to 45cm tall. Prefers full sun and well drained soil. Tolerates dry conditions.
		\$7.00				
Carex buchananii		OP			Canterbury	A densely tufted grass growing to 60cm. Distinctive reddish brown leaves. Prefers moist soil and semi-shade. Tolerates full sun, dry or exposed sites.
		\$7.00				
Carex comans		OP				A very hardy grass that thrives anywhere. The leaves range from a greyish brown to a reddish yellow-green. Grows to 40cm high
		\$7.00				
Carex comans "Frosted curls"		OP				As with the C. comans this grass thrives nearly anywhere. The foliage tends to green in appearance with white (frosted) curling tips. 50cm high.
		\$7.00				
Carex dipsacea		OP				A densely tufted light green sedge growing 30-75 cm tall with a similar habit to C.flagellifera. Occurs on the margins of swamps.
		\$7.00				
Carex flagellifera		OP			Canterbury	A lovely sedge found in damp ground in the open or along forest margins. Excellent colour all year round. Easy care. Grows to 1m+
		\$7.00				
Carex germinata		OP			Canterbury	Can grow from 50cm to 1.3m high. Attractive flower spikes in November to February. Hardy to frost and tolerant of wind.
		\$7.00				
Carex littorosa		OP			Canterbury	A plant growing to 60cm tall that is found in marshes or sandy tidal river banks. Erect habit, leaves pale green to red.
		\$7.00				
Carex maorica		OP			Canterbury	A good plant for environmental plantings as it is uncommon. Grows to 50cm tall. Tolerates dry sites and heavy frost. Full sun or shade.
		\$7.00				

Carex rubra		PB3			A red grass with very dark narrow leaves reaching 35 cm tall. Frost hardy, and tolerates exposed sites.
			\$17.50		
Carex secta	OP			Canterbury	Effective foliage. Ideal waterside sedge. Fast growing. Flower panicles up to 1M dec to jan. Grows to 1.5 by 1.5m
			\$7.00		
Carex solandri	OP			Canterbury	A plant that prefers moist sites in semi-shade to full shade. It grows up-to 50cm high. Will tolerate all conditions.
			\$7.00		
Carex testacea	OP				Sought-after sedge growing to 30-60cm tall. Light green foliage with coppery tones. Best suited to a well drained sunny site.
			\$7.00		
Carex trifida		PB3			Deep brown flower spikes contrast well against blue-green foliage of this sedge that grows to 60cm, in bold clumps. Best in shady, moist sites.
			\$17.50		
Carex virgata	OP			Canterbury	A sedge that grows in swampy areas. It grows to 90cm tall and grows best in damp soils whether sunny or shaded.
			\$7.00		
Carex uncinata	OP			Canterbury	Robust, densely tufted species of sedge that grows to about 40 cm tall. Although depending on conditions, it may grow taller.
			\$7.00		
Chionochloa conspicua		PB5			Snow tussock. Best grown in a slightly moist site in full sun to semi-shade. The plant grows to 1m but the flower plumes can get to 1.8m long.
			\$17.50		
Chionochloa flavicans		PB3			Miniature Toe-Toe. Popular landscaping tussock. Grows to 1m over time. Prefers full sun but tolerates some shade. Well drained soil.
			\$17.50		
Chionochloa rigida		PB3		Canterbury	A hardy tussock found in dry sites. Grows to 1m tall. Hardy to frosts. Prefers full sun and tolerates dry sites.
			\$17.50		
Chionochloa rubra		PB3			Red tussock. An excellent landscaping tussock that suits dry or wet areas. It is very effective grown in groups or mass plantings. Grows to 1.5m+
			\$17.50		
Cyperus ustulatus	OP			Canterbury	Great for planting in wet areas or alongside waterways or ponds. Grows to 1m tall with flower heads reaching 1.2m with a dark brown appearance.
			\$7.00		
Festuca actae	OP			Canterbury	A small upright growing blue-green tussock reaching 30-50cm in height. It is tolerant of quite dry, exposed sites. Easily divided.
			\$7.00		
Festuca novae zelandiae	OP			Canterbury	A hardy erect tussock that grows to 70cm high. It is ideal in rock gardens and grows in full sun or semi-shade, dry, moist and exposed sites.
			\$7.00		
Fincinia nodosa	OP			Canterbury	An uncommon rush that grows in stiffly erect clumps upto 1m tall. It prefers moist conditions and grows naturally around the estuary.
			\$7.00		
Fincinia spiralis		PB3		Canterbury	Pingao. Sedge best grown in full sun in sandy conditions. Found naturally along our coast line binding the dune system. Grows to 90cm high.
			\$17.50		
Hierochloes redolens		PB3			A grass that grows in clumps from 45-90cm tall. Found in wet grassland and scrub throughout NZ. Prefers moist soil in sun or light shade.
			\$17.50		
Juncus edgariae	OP			Canterbury	A rush growing up to 2m tall. Naturally found in damp pasture, wet hollows and lake margins.
			\$7.00		

Juncus pallidus	OP		Canterbury	A rush forming large clumps up to 2m tall this plant thrives in any reasonably moist soil and does well in quite wet spots.
	\$7.00			
Luzula ulophylla	1 litre			Hardy low alpine plant best in well drained gritty-stony sites. 10cm high and forms little tufts. Prefers sun or semi-shade and exposed sites.
	\$13.50			
Machaerina sinclairii		PB3		Broadleaf-sedge. grass like plant with thick drooping leaves. Grows well in sun or semi-shade, moist well drained soil. Tolerates dry conditions.
	\$17.50			
Microleana avenacea	OP			Rice grass. A pleasing grass suitable for underplanting. Grows to 40cm. Prefers a moist soil in semi shade.
	\$7.00			
Poa cita	OP		Canterbury	Silver tussock. Grows in a clump to 50 cm tall. Likes a dry sunny spot and looks best when grown in poor soil.
	\$7.00			
Poa colensoi	OP			Blue tussock. A small plant forming stiff tussocks to about 25 cm tall.
	\$7.00			
Schoenoplectus tabernaemontani	OP		Canterbury	A tall rush like plant 1.5m high or more. Used for environmental planting, but may be grown in wet soils or around the edge of a large pond.
	\$7.00			
Typha orientalis	OP		Canterbury	The raupo is found abundantly in marshy places in lowland regions throughout N.Z. A vigorous deciduous plant growing 2-3m tall. Invasive.
	\$7.00			

We also have access to a wide range of other varieties that we do not grow ourselves. If we do not have what you seek please ask our staff.

# Climbers and Scramblers

Plant Name	Size	OP/1L	PB3/5	PB12/18	Eco-Source	
Brachyglottis sciadophila			PB3		Canterbury	A climber that forms a shrubby mass in the absence of support. Bright yellow daisy like flowers. Semi deciduous. Prefers semi-shade.
			\$17.50			
Carmichaelia kirkii			PB3			NZ Broom. Sun or semi-shade, dry or moist. Creamy white flowers from Oct to Dec. A rare and endangered plant. Bears leaves spring to summer.
			\$17.50			
Clematis afoliata			PB3			A leafless scrambler with stems that grow up to 3m long and are stiff, wiry and grooved. Yellow scented flowers from October to November.
			\$25.00			
Clematis forsterii			PB5			A hardy climber with white/green flowers. Will handle coastal conditions. Prefers a cool root run.
			\$25.00			
Clematis paniculata			PB5			The most vigorous of the native Clematis but difficult to establish. Masses of white flowers & feathery seed heads. Requires a cool root run.
			\$25.00			
Clematis "Purity"			PB5			A cultivar between Clematis paniculata and C. forsterii. Requires a cool root run. Semi-shade
			\$25.00			
Clematis quadribracteolata			PB3			Scented purple flowers. It is best described as a trailing or climbing plant to 2m. Prefers semi-shade, and well drained soil.
			\$25.00			
Fuchsia perscandens			PB3		Canterbury	Flowers late spring to early summer. Scrambling and best suited to well drained semi-shaded sites planted at the base of other trees.
			\$17.50			
Helichrysum dimorphum			PB5			Small white flowers Dec - April. You find this endangered plant growing on river edges, terrace faces and the gorges of the Waimakariri Basin.
			\$17.50			
Metrosideros diffusa			PB3		Canterbury	A clinging climber with small clusters of white flowers. It likes a cool or shaded root run but will grow in a moist well drained site with sun/shade.
			\$25.00			
Parsonsia capsularis			PB3		Canterbury	A semi vigorous climber. Small but sweetly scented flowers in spring and summer. Prefers cool root run.
			\$25.00			
Parsonsia heterophylla			PB3		Canterbury	A vigorous climber. Profusion of white, fragrant flowers from Sep to Mar. Prefers well drained soil and tolerates coastal conditions.
			\$25.00			
Passiflora tetrandra			PB3		Canterbury	Scented greenish white flowers Nov to Dec. Needs a cool root run and any reasonable soil.
			\$25.00			
Rubus cissiodes			PB3		Canterbury	A vigorous and vicious climber with white panicles of flowers in spring. It is an attractive plant if you have space to avoid its thorns.
			\$17.50			

Rubus schmelioides	PB3	Canterbury	This looks like R. Cissioides but is less vicious.
	\$17.50		
Rubus squarrosus	PB3	Canterbury	A vigorous and sparsely foliated climber found throughout New Zealand, with white flowers in spring. Plant in either a dry or moist soil in full sun.
	\$17.50		

---

We also have access to a wide range of other varieties that we do not grow ourselves. If we do not have what you seek please ask our staff.

# Hebes

Plant Name	Size	OP/1L	PB3/5	PB12/18	Eco-Source
Hebe "anomala"			PB3		
			\$17.50		Grows to 1.2m with purplish tipped leaves. White flowers in summer. Hardy to full sun, dry and exposed conditions. Prune back annually.
Hebe "Inspiration"			PB3		
			\$17.50		A neat compact shrub suited to coastal localities, grows to about 75cm. Purple flowers Nov - Dec. Prefers sun/semi-shade, dry exposed site.
Hebe "James Stirling"			PB3		
			\$17.50		A fairly slow growing plant 40cm tall by 60cm. It forms a flat topped shrub with rich golden foliage and white flowers in early summer. Hardy.
Hebe albicans		OP	PB5		
		\$7.00	\$17.50		A compact shrub up to 1 m high. It is quite hardy, suits full sun, will stand some shade. White flowers for about 1 month during December.
Hebe Red Edge			PB3		
			\$17.50		Flowers are violet in colour and appear in Summer. Grows 60-80cm. Prefers full sun. Prune back annually.
Hebe annulata			PB3		
			\$17.50		A whipcord hebe 10-15cm tall. Hardy, will handle a bit of wind exposure. Best grown in a well drained or dry site in full or semi-shade.
Hebe armstrongii			PB3		
			\$17.50		A 1m tall whipcord hebe. Greeny-yellow foliage and rarely flowers. Best used as a foliage plant due to its conifer like appearance.
Hebe biggarii			PB3		
			\$17.50		A small prostrate hebe that grows 10cm by 20cm with white flowers. It will handle frost, dry/moist, full sun, semi-shade and exposed sites.
Hebe buchananii			PB3		
			\$17.50		Low growing with tight foliage and habit. Blue-green foliage with white flowers in Nov. Amazing in a rock garden. 20 x 90
Hebe chathamica			PB3		
			\$17.50		A rambling shrub growing to 10cm high and 1.2m wide. During summer it is smothered by white flowers. This is an ideal plant in a coastal site.
Hebe christensenii			PB3		
			\$17.50		A rounded plant growing to 90cm. It is hardy and grows in sun or semi-shade, dry or moist sites. Prune annually.
Hebe cupressoides			PB3		
			\$17.50		A rounded plant that can grow to 2m. The flowers are tiny white/lavender stars. It requires good drainage. Looks impressive en-masse.
Hebe diosmifolia		OP	PB5		
		\$7.00	\$17.50		Growing to 1.2m with a pale mauve flower that fade to white during spring. Prefers a sheltered site, with good drainage and full sun.

Hebe edinensis		PB3			A low growing plant up to 30cm tall by 60cm + wide. White/ light mauve flower in summer, it should be trimmed to maintain a good shape.
			\$17.50		
Hebe elliptica		PB3			Grows to 1.5m. Large white flowers late spring and early summer. Tolerant to harsh conditions, a good coastal plant. Prune hard annually.
			\$17.50		
Hebe Emerald Gem		PB3			A low bun shaped plant growing 20-30 cm tall, with attractive fresh green semi whipcord foliage.
			\$17.50		
Hebe epacridea		PB3			White flowers during May-June. Grows 10cm x 50cm. It will tolerate frost, full sun, and moist soil but prefers well drained soils in exposed sites.
			\$17.50		
Hebe hectorii		PB3			A whipcord hebe growing to 60cm high. Prefers full sun, well-drained soil. White flowers and requires a light trim annually after flowering.
			\$17.50		
Hebe laingii		PB3			A very compact whipcord hebe growing 30-50cm tall. It has white flowers in summer, requires a well drained soil. Suitable for colder areas.
			\$17.50		
Hebe Lindsayi		PB3			An erect rounded shrub to about 75cm. Pale pink flowers in summer. Prefers full sun, and well-drained soil.
			\$17.50		
Hebe ' McEwanii'	OP	PB5			A compact shrub growing 50 cm, with small narrow blue/grey leaves on purplish stems. Pale mauve flowers. Full sun and well-drained soil.
			\$7.00	\$17.50	
Hebe macrantha		PB3			This hebe grows to 60 cm and produces large white flowers. A light prune after flowering will encourage more compact growth.
			\$17.50		
Hebe mckean		PB3			Growing 40 x 60cm with white flowers. Ideal as an edging plant, pot or a small rock garden. Full sun.
			\$17.50		
Hebe odora	OP	PB5			It grows to 1.5m tall and has white flowers in late spring. A light pruning or clipping is recommended after flowering helps to keep it compact.
			\$7.00	\$17.50	
Hebe odora "Prostrata"		PB3			A hardy and easy to grow plant, growing to 20cm tall x 60cm wide with small white flowers in summer. Great for rock gardens.
			\$17.50		
Hebe 'Pagei'		PB3			An attractive low spreading plant. Small white flowers cover the plant late Spring early Summer. Best in free-draining soil in full sun. 30x90cm wide.
			\$17.50		
Hebe pauciramosa		PB3			Grows to 50cm tall. A compact hebe with white flowers Oct - Jan. Prefers sun/semi-shade, moist/wet and exposed sites.
			\$17.50		
Hebe pimelioides "Quicksilver"		PB3			Attractive grey foliage and blue/purple flowers in summer. Amazing bonsai potential. It is best grown in a sunny, dry site. 45 x 75
			\$17.50		
Hebe pimelioides var glauca		PB3			An attractive plant that can fall over and become decumbent with age. Great for rock gardens. It has a Violet-blue flower in summer. Full sun.
			\$17.50		
Hebe pinguafolia	OP	PB5			Grows 25cm high and maintains excellent shape. Flowers are white appear in December. Prefers full sun, dry, exposed sites. Hardy.
			\$7.00	\$17.50	
Hebe pinguafolia var sutherlandii	OP	PB5			This plant grows to 45cm then becomes decumbant and sprawling. It is frost hardy, enjoys full sun and well drained sites.
			\$7.00	\$17.50	

Hebe recurva	OP	PB5			Grows to 90cm tall and has spikes of white flowers in summer. It needs no pruning and likes a sunny, well drained site. Good for small gardens.
		\$7.00	\$17.50		
Hebe salicifolia	OP	PB5		Canterbury	Koromiko. White flower spikes throughout year and it should be pruned after flowering to be kept neat. Hardy but prefers good airflow.
		\$7.00	\$17.50		
Hebe speciosa		PB3			A rounded bushy shrub 1-2m. Beetroot purple to violet purple flowers. Good airflow is essential so it is suited to an exposed site. Prefers full sun.
			\$17.50		
Hebe stricta		PB3			Quite hardy wherever you grow it. It has white flower spikes from December to March. Prune annually to maintain shape.
			\$17.50		
Hebe strictissima		PB3		Canterbury	A local plant that grows to 1-2.5m tall and has white flowers that cover the plant in summer. Trim to keep tidy.
			\$17.50		
Hebe subalpina		PB3			A densely branched shrub growing upto 2m tall. White flowers Dec to Jan. It is hardy to frost full sun/semi-shade, moist and exposed conditions.
			\$17.50		
Hebe tairawhiti		PB3			Similar to H. stricta but with a yellowish stripe in the leaf. Forms a large ball 3m tall. Quick growing and hardy to most conditions.
			\$17.50		
Hebe topiaria	OP	PB5			Neat ball shape hebe with blue-grey foliage and white flowers. Tolerant of wind and coastal exposure. Grows 1m. Prefers full sun.
		\$7.00	\$17.50		
Hebe townsonii	OP	PB5			A rounded shrub growing to 1m. Glossy foliage and white flowers in spring. Tolerant of sun or semi-shade. Prune after flowering. Dry sites.
		\$7.00	\$17.50		
Hebe Waireka		PB3			Thick green leaves with purple flower spikes in summer. Grows to 1m. Trim once a year, usually after flowering. Full sun, drier site.
			\$17.50		
Hebe Wiri Dawn		PB3			A low spreading hebe 45cm x 1m, with pale olive-green foliage. It bears pale pinkish white flowers most the year. Prefers full sun.
			\$17.50		
Hebe Wiri Gem		PB3			A neat tidy plant to 90cm tall. Flowers are rose pink. This hebe flowers for upto 9 months but mainly during the summer. Prefers full sun.
			\$17.50		
Hebe Wiri Image		PB3			A vigorous yet neat shrub growing 1m high, fresh green foliage and long racemes of violet flowers early summer. Prefers full sun.
			\$17.50		
Hebe Wiri Mist		PB3			A spreading shrub up to 60 cm high and more across, which bears masses of white flowers from late spring. A popular plant for mass planting.
			\$17.50		
Hebe Wiri Splash		PB3			A dense shrub growing 50 x 70 cm, with yellowish green foliage and a single flush of lilac flowers in early summer, and it is also cold hardy.
			\$17.50		
Hebe youngii		PB3			A useful rock garden or edging plant. Flowers Nov - Dec and they are whitish. Grows to 25cm tall but will spread to 60cm.
			\$17.50		

We also have access to a wide range of other varieties that we do not grow ourselves. If we do not have what you seek please ask our staff.

# Ferns

Plant Name	Size	OP/1L	PB3/5	PB12/18	Eco-Source	
Austroblechnum penna-marina			PB3		Canterbury	A groundcover Fern common throughout NZ. Easy to grow in sun or semi-shade, moist. Ideal for rock garden or under shrubs.
			\$17.50			
Microsorium pustulatus			PB3		Canterbury	Hounds tongue. A hardy groundcover fern that grows on ground or over rocks. Can grow on another plant. Glossy green fronds up to 70cm long.
			\$17.50			

We also have access to a wide range of other varieties that we do not grow ourselves. If we do not have what you seek please ask our staff.

# Trees & Shrubs

Plant Name	Size	OP/1L	PB3/5	PB12/18	Eco-Source	
Alectryon excelsus			PB5		Canterbury	Titoki. Prefers semi-shaded, moist and sheltered site. Can handle medium frost. Fruits in spring & early summer. Attracts birds.
			\$17.50			
Aristotelia fruiticosa			PB3		Canterbury	Mountain Wineberry. Trim occasionally to retain a good shape. Flowers spring to early summer. Semi shade to full sun.Grows from 1-2m.
			\$17.50			
Aristotelia serrata			PB5		Canterbury	Makomako or Wineberry. Mottled red foliage, flowers during Oct, followed by dark red-black berries. Prefers a rich moist soil and semi-shade. Attracts birds.
			\$17.50			
Brachyglottis elaeagnifolia			PB3			A shrub up-to 3m tall. Flowers appear January to February. It requires good airflow and drainage.
			\$17.50			
Brachyglottis greyii			PB3			Tolerates sun or shade but requires good drainage. Bright yellow daisy flowers Dec to Mar. Very hardy. Grows to 1.5m x 1.5m
			\$17.50			
Brachyglottis hectorii			PB3			Hectors tree daisy. This easily recognised plant with distinctive leaves grows 1.2 - 1.8m high. Requires moist soil in shade or part shade.
			\$17.50			
Brachyglottis Leonard Cockayne			PB5			Large spreading shrub, 2.5m x 3m. Yellow flowers during Dec to Jan. It is an excellent plant for growing in dry places. Prune regularly.
			\$17.50			
Brachyglottis monroi			PB3			Daisy Bush. Prefers sun or semi-shade, and dry. Yellow daisy-like flowers dec to mar. Compact rounded shrub. 90 x 90cm
			\$17.50			
Brachyglottis repanda			PB5			Rangiora or Bushmans friend. Large leaves, with small creamy and fragrant flowers from Aug - Nov. Grows in most sites with free draining soil
			\$17.50			
Brachyglottis repanda "purpurea"			PB5			Purple-leaved form of B repanda. Free-draining soil Up to 3m high, can be pruned. Outstanding foliage. Coastal tolerant.
			\$17.50			
Brachyglottis rotundifolia			PB5			Muttonbird scrub. Glossy dark green leaves with brown undersides and white flowers. Prefers well drained sites and good airflows. 6m
			\$17.50			
Carmichaelia angustata			PB3			NZ Broom. Semi-shade, dry or moist. Purple flowers Feb to Apr. Will not tolerate salty wind. Attracts birds. 2m
			\$17.50			
Carmichaelia arborea			PB5			NZ Broom. A hardy shrub, growing to 3m high. This is a good plant for sand dune restoration and slope stabilisation. Full sun or partial shade.
			\$17.50			

Carmichaelia crassicaulis		PB3			NZ Broom. Stiff erect shrub. Purplish or cream flowers in summer. Ranges from 30cm to 2m tall. Easily grown
			\$17.50		
Carmichaelia var racemosa		PB3			Coral broom. A threatened leafless shrub up to 1.2m, suitable for a sunny site with free draining soil.
			\$17.50		
Carmichaelia glabrescens		PB3			A weeping broom growing to 3m in the garden. The flower is a Rosy Pink from Mid December. Prefers well drained sites.
			\$17.50		
Carmichaelia kirkii		PB3			
			\$17.50		
Carmichaelia monroi	1 litre				A rare dwarf, much branched shrub 15cm x 20cm. Large pinkish purple flowers. Prefers a well drained soil and full sun.
			\$13.50		
Carmichaelia muritai		PB3			This nationally endangered tree grows up to 5-6m tall. White flowers from Dec to Jan. Prefers free draining, fertile soil in a sunny, sheltered position
			\$17.50		
Carmichaelia nana	1 litre				Dwarf broom. Growing not more than 5cm high. Purple and cream flowers Nov-Jan. Leafless in its adult form. Prefers sun and well drained soils.
			\$13.50		
Carmichaelia odorata			PB12		Tree Broom. Scented white veined purple flowers from nov to jan. Prefers semi-shade or full sun. Tolerates dry conditions. 2m
			\$50.00		
Carmichaelia petrei		PB3			A very distinctive sturdy shrub up to 2m with stiff, grooved branchlets that have yellow prickly tips. Small purple flowers from November. Very Hardy.
			\$17.50		
Carmichaelia stevensonii		PB3	PB12		Weeping broom. A stunning tree growing to 9m, with an umbrella canopy of drooping branches. Endangered species. Masses of lilac flowers in Dec.
			\$17.50	\$50.00	
Carmichaelia williamsii		PB5			Prefers semi-shade, moist soil. Yellow flowers throughout the year. Grows to 4m and is frost hardy. Endangered.
			\$17.50		
Carpodetus serratus		PB5		Canterbury	Marble leaf or putaputaweta. A good canopy tree and very hardy. Profusions of fragrant flowers Nov - Mar. Fruit attracts birds. 10m
			\$17.50		
Coprosma "Beatsons Gold"		PB3			Forms a fairly compact bush from 1.2 to 2m tall. Requires some pruning to keep its shape. It is best planted in a sunny situation.
			\$17.50		
Coprosma aerolata		PB3			Thin-leaved coprosma. Slow growing shrub to 5m. Fruits are purple/black from march onwards. Prefers moist soil and sun/semi-shade.
			\$17.50		
Coprosma 'Black Cloud'		PB3			Attractive ground cover, with small shiny dark leaves. Grows to 1m spread and 2m in height, easily maintained. Hardy.
			\$17.50		
Coprosma crassifolia		PB3		Canterbury	Mingimigi. A much branched divaricating shrub to 2m tall. White/cream coloured fruit during March and April which is attractive to birds. Full sun.
			\$17.50		
Coprosma linarifolia		PB3		Canterbury	Mikimiki or yellow wood. Fast growing shrub or small tree. Very hardy, prefers open situation. Fruit is a translucent white drupe 6mm long.
			\$17.50		
Coprosma lucida		PB3		Canterbury	Shining karamu. Used as a nurse plant in revegetation. Orange/red fruit in Feb and Mar. Grows in most conditions. Attracts birds. 3m
			\$17.50		

Coprosma propinqua	OP	PB5		Canterbury	Mingimingi. A variable species which is known to grow from 1-6m high. It does best in an open sunny site. Attracts birds.
		\$7.00	\$17.50		
Coprosma repens	OP				Taupata or mirror bush. A vigorous coastal plant. Orange fruit Mar - April. Does best in a coastal, dry and exposed site. Attracts birds.
		\$7.00			
Coprosma rhamnoides		PB3		Canterbury	Twiggy coprosma. A dainty divaricating shrub that grows to 3m. Most suited to a well drained soil and semi- shade.
			\$17.50		
Coprosma Canterbury Gold		PB3			Our very own selected form of C. rhamnoides. It has a vibrant green/gold foliage.
			\$17.50		
Coprosma robusta	OP			Canterbury	Karamū. A rapid growing plant with vast amounts of orange-red fruit for long periods that birds find attractive. Hardy and grows to 6m.
		\$7.00			
Coprosma rotundifolia		PB3		Canterbury	Lovely small leaved coprosma with round pale green, purple, red and bronze leaves. Prefers sun or semi-shade in slightly moist conditions. 5m
			\$17.50		
Coprosma rubra		PB3		Canterbury	A plant that grows to 2-3m tall. It can withstand heavy frost, full sun and semi-shade, dry or exposed sites. Its fruit is white and ripens May to June.
			\$17.50		
Coprosma rugosa		PB3			Quick growing upright shrub to 3m tall. It has large amounts of pale blue fruit which is highly attractive to birds. Hardy and will tolerate most sites.
			\$17.50		
Coprosma rugosa 'Midnight'		PB3			A C. rugosa selection with fine dark foliage and irregular shape. Grows to 45-60cm.
			\$17.50		
Coprosma taylorii (syn dumosa)		PB3		Canterbury	A shrub to 3m tall. The pale gold-clear fruit appears in late Jan -Apr. It will tolerate frost, sun or semi-shade, dry, moist and exposed sites.
			\$17.50		
Coprosma 'Taiko'		PB3			A prostrate shrub with dark green leaves that forms a dense groundcover. Can be used for trailing down retaining walls. Very hardy.
			\$17.50		
Coprosma wallii		PB3		Canterbury	Bloodwood. A rare shrub that grows up to 3m tall. Small white flowers and berries. Tolerates most conditions.
			\$17.50		
Coprosma virescens		PB3		Canterbury	An attractive divaricating shrub growing 2-3m high. It has an overall golden coppery glow from its tangled branches. Hardy.
			\$17.50		
Cordyline australis	OP	PB5	PB18	Canterbury	Ti kōuka or cabbage tree. A truly New Zealand plant that can look great wherever it is planted. Nectar and fruit for birds. Full sun, dry sites
		\$7.00	\$17.50	\$50.00	
Corokia "Bronze Knight"	OP	PB3			A shrub that produces yellow flowers and red fruit. Will grow to from 1.8-2.4m tall. Great hedging plant. Tolerates full sun, shade.
		\$7.00	\$17.50		
Corokia buddleioides	OP	PB5			A hardy shrub, great for hedges. Masses of yellow starry flowers Oct - Dec, followed by red/yellow berries. Prune to maintain. Prefers full sun.
		\$7.00	\$17.50		
Corokia cotoneaster		PB3		Canterbury	A dense bush 1-3 meters tall. Very tolerant of dry exposed sites including coastal winds. Prefers full sun.
			\$17.50		
Corokia Frosted Chocolate	OP	PB5			A lovely neat shrub with quite rich chocolate foliage. Hardy and best in a sunny site. Grows to 2m. Red berries/yellow flowers.
		\$7.00	\$17.50		

Corokia x virgata cheesemanii	OP	PB5			An ideal hedging plant, grows from 1.8-2.4m tall and can be easily trimmed. Prefers full sun, hardy to frost and coastal exposure.
		\$7.00	\$17.50		
Corynocarpus laevigatus		PB5			A upto 15m. Orange fruit ripens in January-April. The kernel of the fruit should be treated as deadly poison.
			\$17.50		
Dacrycarpus dacrydioides	OP	PB5	PB18	Canterbury	Kahikatea or White Pine. The tallest of our native trees reaching full potential after 750 years. Prefers shelter and wet swamplands.
		\$8.50	\$25.00	\$50.00	
Discaria toumatou		PB3		Canterbury	Matagouri. A spiny shrub or tree reaching upto 5m tall. Prefers a dry sunny site. Makes a wonderful contrasting plant or home security system.
			\$17.50		
Dodonaea viscosa	OP	PB5	PB18	Canterbury	Ake Ake. Growing to 6m high, can be used as hedging or as a shelter plant. Fast growing and tolerates coastal conditions. Prefers well drained soil.
		\$7.00	\$17.50	\$50.00	
Dodonaea viscosa "purpurea"	OP	PB5	PB18		Very similar to its green counterpart but it is much hardier to frost. Trim lightly to prevent becoming leggy. Prefers full sun and dry site.
		\$7.00	\$17.50	\$50.00	
Entelea arborescens		PB5			Whau. Slow growing small tree to 3m tall. Clusters of white flowers in early summer.
			\$17.50		
Eleoacarpus hookerianus		PB3		Canterbury	Pokaka. A medium sized tree from 4-12m high that passes through a distinct juvenile stage. Likes a moist site and preferably shady.
			\$25.00		
Fuscaspora cliffortioides		PB5	PB18	Canterbury	Mountain Beech. A spreading tree that grows up to 25m high. Hardy to frosts and tolerant of wind exposure. Grows well in wet soil.
			\$25.00	\$50.00	
Fuscaspora fusca		PB5	PB18		Red Beech. Handsome specimen and timber tree. Young trees have bright-red foliage during winter. Rapid early growth. Hardy
			\$17.50	\$50.00	
Fuscaspora solandri		PB5	PB18	Canterbury	Black beech.
			\$25.00	\$50.00	
Fuchsia excorticata		PB5		Canterbury	Kotukutuku or Tree fuchsia. Small tree with loose and papery bark on trunk. Purple-red flowers early spring to summer. Prefers semi-shade.
			\$17.50		
Griselinia littoralis	OP	PB5	PB18	Canterbury	Kapuka or NZ Broadleaf. A versatile hedging or shelter plant, with deep green glossy leaves. Hardy and tolerates most conditions. Easily trimmed
		\$7.00	\$17.50	\$50.00	
Halocarpus bidwillii	PB3				Mountain or bog pine. A low growing spreading shrub up to 1-2m. Can be grown in a rock garden or in damp places.
			\$13.50		
Hedycarya arborea		PB5		Canterbury	Pigeonwood. A tree growing to 6m, orange/red fruit that is highly attractive to birds. Prefers shelter. Frost sensitive.
			\$17.50		
Helichrysum intermedium		PB3			A miniature shrub with dark green foliage appearing almost as scales against the stem. Creamy white flowers in summer. Grows to 30cm.
			\$17.50		
Helichrysum lanceolatum		PB3		Canterbury	A shrub to 3m tall. It has tiny flowerheads with clusters of creamy/white scented flowers October-November. Endemic to NZ
			\$17.50		
Helichrysum parvifolium		PB3			The yellow flowered helichrysum that flowers Nov-Mar. It grows to 50cm. Best in full sun, and well drained soil. Ideal for rock gardens and pots.
			\$17.50		

Hoheria angustifolia	OP	PB5	PB18	Canterbury	Narrow leaved houhere. Slender tree with clusters of pure white flowers in Dec-Mar. Best in full sun. Juvenile form has a distinct weeping habit.
		\$7.00	\$17.50 \$50.00		
Kunzea robusta	OP			Canterbury	Kanuka. Hardy tree to 15m high in the wild. Clusters of small white flowers from Sep to Feb. Quick growing. Prefers full sun/semi-shade.
		\$7.00			
Kunzea serotina	OP			Canterbury	Kanuka. Hardy tree to 15m high in the wild. Clusters of small white flowers from Sep to Feb. Quick growing. Prefers full sun/semi-shade.
		\$7.00			
Leptocophylla juniperina		PB3		Canterbury	A low growing shrub found throughout NZ in lowland shrub, forest and rocky places. Small white flowers followed by white, pink or red berries.
		\$17.50			
Leptospermum scoparium	OP			Canterbury	Manuka. A very hardy plant to 4m. White flowers quite often with a pink center. It prefers an open situation in full sun with good drainage.
		\$7.00			
Leucopogon fasciculatus	1L			Canterbury	Soft mingimingi. A slow growing shrub or small tree up to 5m. Prefers a dry spot in sun or semi-shade. Small flowers then red berries in autumn.
		\$13.50			
Lophomyrtus "Kathryn"		PB3	PB18		A small tree to 2m with deep purplish-red colouring, and cream star flowers. It prefers a well drained soil in a sunny position.
		\$17.50	\$50.00		
Lophomyrtus obcordata	OP	PB5	PB18	Canterbury	Rohutu. A spreading shrub or specimen tree upto 5m high. Star like creamy flowers. Prefers sun or shade in a moist, well drained soil.
		\$7.00	\$17.50 \$50.00		
Lophozonia menziesii		PB5			Silver Beech. Grows to 10m in cultivation. When grown in an open situation, silver beech forms handsome spreading dome shaped canopy.
		\$25.00			
Macropiper excelsum		PB3			Kawakawa. A frost tender plant that grows from 2-6m depending on site and conditions. Prefers shade and semi moist soil.
		\$17.50			
Melicope simplex		PB3		Canterbury	Poataniwha or tataka. Grows up to 5m tall. The flowers attract insects. Tolerates most conditions. Branches interlacing.
		\$17.50			
Melicytus alpinus		PB3		Canterbury	Porcupine scrub. Low rigid shrub grows 50cm x 1m. It has interlacing branches and few leaves. It has tiny white bell shaped flowers.
		\$17.50			
Melicytus micranthus		PB3			Small-leaved milk tree or tūrepo. A divaricating but erect shrub reaching 2m. It prefers a dry situation but will grow nearly anywhere.
		\$17.50			
Melicytus obovatus		PB3			Hardy shrub to 2-3m tall. It is naturally a coastal plant and will withstand exposed, dry, full sun and frosts.
		\$17.50			
Melicytus ramiflorus		PB5		Canterbury	Mahoe or whitey wood. Best suited for a large garden or as a shade tree. Grows to 6m tall and does best in a sheltered situation.
		\$17.50			
Metrosideros excelsa		PB3			Pohutukawa. A tree up to 20m in height and produces crimson to brilliant red flowers during December through to January.
		\$25.00			
Metrosideros umbellata		PB3			A small, very slow growing tree 3 - 6m high. It produces blood red flowers Nov to March. It will grow in most well drained soils.
		\$25.00			
Muehlenbeckia astonii		PB3			A shrub growing 1-2.5m tall with tangled wiry stems and small heart shaped dark green leaves. Very hardy, able to tolerate quite dry soil.
		\$17.50			

Myoporum laetum	PB5	PB18	Canterbury	Ngaio. Tree growing 4-6m high. Young plants are frost tender. Best in fairly good soil, but grows in poor dry soils. White flowers Oct to Jan.
	\$17.50	\$50.00		
Myrsine australis	PB3		Canterbury	Māpou or red matipo. Hardy, fast growing tree up to 7m tall. Thrives in almost any soil and site. Similar in appearance to Pittosporums.
	\$17.50			
Myrsine divaricata	PB3	PB12	Canterbury	Weeping matipo. Prefers a good soil but is very hardy. Unusual weeping habit. Berries ripen Aug - May.
	\$17.50	\$50.00		
Myrsine nummularifolia	PB3			Prostrate or rambling plant to 30 cm. It flowers in October through to February. Plant in a well drained soil, in sun or partial shade.
	\$17.50			
Neomrytus pendunculata	PB3		Canterbury	Rohutu. Slow growing shrub or small tree, 2-3m. Tiny white flowers in Summer, followed by orange-red berries which attract birds.
	\$17.50			
Olearia adenocarpa	PB3		Canterbury	Small-leaved tree daisy. A critically endangered shrub upto 3 m high. Grows only in dry sights.
	\$17.50			
Olearia arborescens	PB5			Shrub 4m x 2m. Produces creamy-white flowers Oct to Jan. Prefers a sunny site, tolerant of exposure to wind and coastal exposure.
	\$17.50			
Olearia avicenniifolia	PB5		Canterbury	Vanilla scented tree daisy. Grows to 6m tall. Prefers full sun and tolerates dry conditions. Can be pruned to maintain shape.
	\$17.50			
Olearia cheesemanii	PB5			Great hedging shrub with highly scented flowers. Likes an annual prune. Grows 1.5m to 2.5m. Prefers full sun and well-drained soil.
	\$17.50			
Olearia coriacea	PB3			Shrub 1.8-3m tall, drought resistant, useful as a low growing hedge. Plant in a well drained, sunny position. Withstands heavy frosts.
	\$17.50			
Olearia cymbifolia	PB3			Neat shrub with boat shaped leaves and a erect habit up to 1.2m. White flowers with a yellow centre from November to January. Hardy.
	\$17.50			
Olearia dartonii	PB3			A shrub with very narrow leaves and slender drooping branches. It grows between 1.8 and 4.6m tall. Hardy and tolerates coastal conditions.
	\$17.50			
Olearia fragrantissima	PB3		Canterbury	Grows to about 3m. Tiny yellowish green and fragrant flowerheads spring to early summer. Withstands dry conditions and tolerates strong winds.
	\$17.50			
Olearia ilicifolia	PB3			Hakeke or Mountain holly. Produces musk scented white flowers from Dec to Jan. The mountain holly requires a cool moist situation.
	\$17.50			
Olearia ilicifolia x moschata	PB3			White daisy flowers from Dec-Jan. Needs adequate moisture & good drainage. Does well if in light shade. Uncommon. 1.5m
	\$17.50			
Olearia macrodonta	PB3			A tree growing 1.5 to 6m tall that produces white flowers with a yellow centre during October though to January. Growing well in shady spots.
	\$17.50
